Detailed Action

Specification

The title, under 37 CFR 1.72, should be brief, descriptive and technically accurate and should be placed on the top portion of the first page of the specification.

On page 4, line 17, after "lunch box at ..." and just before "convenience ...", two graphical identifiers namely a circle and a triangle have no apparently meaning.

Claim Status

Claims 1-2 are currently pending in the Instant Application.

Claim Objections

Claim 2 is objected to because of the following informalities:

Concerning claim 2, line 2, "informationmeans" should apparently be --information means--.

Further, the claimed invention will be broadly interpreted because of its disclosure.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

Art Unit: 3622

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Scroggie et al. (Scroggie hereinafter), WO 97/23838.

As per claims 1-2, Scroggie teaches an incentive distribution network or system over the Internet wherein a plurality of purchasing incentives and shopping aids are made available for qualified customers through the Internet or via e-mail. A customer (10) of retail stores, logs into the system and then elects to browse among available purchasing offers (18, 22), elects to claim a product rebate or to receive product information. The system merges customer's supplied information (270) with other purchase incentive data (272) and creates a printable graphical image of the purchasing incentive (282) for transmission to the customer. In an alternate embodiment, the purchase incentive is not transmitted directly to the customer. Instead, the terms of the incentive are transmitted electronically to the retail store (310) of fig. 13 designated by customer (10) or located in the customer's **geographical** region, who receives either a token (316) having at least a specific code or a bar code to present at the store or an advisory message used along with other identification to identity the customer at the POS during a redemption process. Further, in yet another embodiment, incentives may be targeted to specific customers based on a customer's purchase history (502) and transmitted to the consumers by e-mail using

the customers' e-mail addresses stored in a consumer database (506). In other words, notification or indication of the availability of these incentives is transmitted to the customers in the form of Internet messages, for retrieval when the customers or consumers next access a web site associated with the system or check their e-mails. Moreover, the incentive message informs a customer that one or more specific offers are available and can be received at a participating POS when the prerequisite products are purchased. Alternatively, subsequent to receiving an e-mail notification or an indication of an incentive offer, an image of a paper coupon may be transmitted to the customer's computer site and printed for later presentation at pre-selected POS.

In a further embodiment of the invention, incentives may be customized or targeted to a specific customer based on the customer's purchase history (previous purchase) 502 collected at a retailer's store after the sale of one or more products and provided to a product manufacturer or distributor or System Administrator, and wherein the purchase history data comprising at least one product sold at the retailer's and wherein after this customization, by the manufacturer or provider or distributor of the product in conjunction with the retailer, the incentives are transmitted to consumer's computer 510 via electronic mail or e-mail address stored in a consumer database 506 storing customer's registration information or via a personal web page in the computer network established for each consenting consumer, based upon the customer's demographic profile and purchase history, wherein the personal web page is used to display the customized incentives to the user or customer whenever he/she logs into the network subsequent to sending an e-mail notification to the customer inviting him/her to log into the network and visit his personal web page to view and download these customized incentives.
